

ONE LINE

Cheap access, stay, build, and crew now is how a southern-hemisphere civilisation still has a lane worth imagining later — Present compass under an open Imagine horizon.

SECTOR (ASA Jul 2025)

ASA cites ~A\$4.6bn (dated baseline*) · Jul 2025 sheet ~17k FTE / ~620 orgs — label years.

TSA — 23 JUL 2024

Enables US launch tech from AU soil. Still needs AU permits. Not an ITAR free pass / MoU.

STATEMENT ON SPACE

21 Jul 2026 · five focus areas. NRFC space claim ~A\$200m / 6 cos / ~600 jobs (govt).

WHO'S LIVE (SEP 2026)

- Gilmour — Licensed Bowen orbital pad (Mar 2024). Eris TF1 30 Jul 2025 anomaly (~T+9s/~T+17s pumps); report 24 Apr 2026. TF2 early 2027*. Series E A\$217m (NRFC A\$75m, Jan 2026). ElaraSat SpaceX rideshare 24 Jun 2025.
- Southern Launch — Series A A\$25m (30 Jun 2026; NRFC A\$10m). Koonibba: first commercial re-entry Feb 2025; ≥4 by May 2026 (Varda W-6). Whalers Way: polar/SSO; approvals late 2024; construction 2026.
- Neumann — Commercial ND-25 on Transporter-16 (~30 Mar 2026); eight units on T-17 (Jul 2026); more 2026 Transporters manifested. ND-50 on CarbSAR (Jan 2026). Debris→fuel = roadmap only.
- Titomic — cold-spray parts/repair; NASA SAA 11 Feb 2026 + US CRADA — not hull factory. Do not equate Lab22-as-Titomic-factory.
- Fleet Series D A\$150m / A\$800m+ (Dec 2024). Hypersonix DART AE 27 Feb 2026 >Mach 5 (Wallops/HASTE). EOS Atlas HEL = demos, no binding sales.

STARSHIP ADJACENCY (FACT-SAFE)

- Ship 40 — IO splashdown ~24 Jul 2026 (intl waters first); ~24d at sea; tow to Christmas Island waters ~18 Aug; FORTE ~28 Aug to Starbase. Adjacency under TSA era — not pad/MoU.
- No Starship MoU found. No AU pad claimed for Starship-class cadence.
- ELA/Arnhem not live — ceased Dec 2024; liquidation early 2026. North = diligence geography only.
- Geography edge: Bowen mid-inclination · Whalers Way polar/SSO · Christmas Island recovery adjacency · southern-hemisphere option among many.
- Blockers: ITAR still applies · every launch needs AU permits · no public Starship-grade methalox chain · thin specialist workforce · Eris not orbital yet.

PRESENT VERBS + HARD NO'S

Access · Stay · Build · Crew

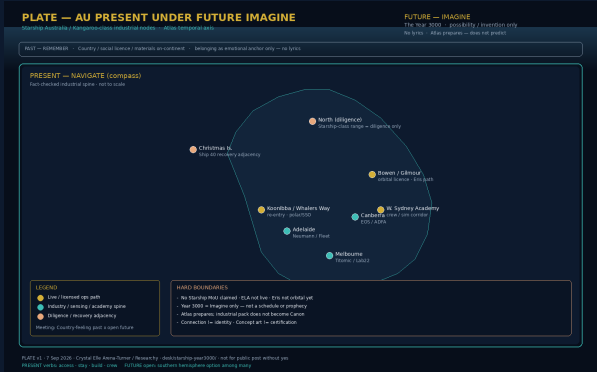

Access = frequent launch/return geography. Stay = commercial EP (Neumann) + mobility roadmap. Build = AM pilots (Titomic/Lab22). Crew = Academy model (W. Sydney + ADFA) — no charter claimed; holodeck = sim first.

HARD NO'S: No Starship MoU · ELA dead (liquidation) · Eris not orbital · SPiRIT ≠ Gilmour · Titomic ≠ hull · art ≠ cert · Year 3000 ≠ schedule · no Cape York MoU cosplay.

FUTURE — IMAGINE (ATLAS YEAR 3000)

Possibility / invention horizon — named song *Year 3000* (Busted / Jonas Brothers) as Imagine anchor. Atlas prepares — does not predict. Short quotes only; not a lyric sheet. Not a capital claim, MoU, or pad schedule. Multiplatinum: UK Busted 2x fact; US prophecy still open. Southern option among many.

MAP PLATE — PRESENT UNDER IMAGINE

TEMPORAL AXIS + TIDE

- Past — Remember: Country / social licence / on-continent materials (belonging as feeling only — no lyrics).
- Present — Navigate: TSA · Bowen · Koonibba · Neumann · Titomic · Ship 40 adjacency · hard no's.
- Future — Imagine: Year 3000 open cups — STAR (where southern shipyard sits) · CRYSTAL (pads/schools under pressure) · DREAM (Academy as rehearsal) · MAGNET (what still pulls: TSA, AUKUS trust, CI logistics).
- P1 12 mo — structure + range diligence (prove compass).
- P2 24 mo — Academy ~100 cadets (rehearse crew before myth hardens).
- P3 5 yr — print → launch → assemble demo (one structure in a longer unmapped future).

POLICY FIT (STATEMENT ON SPACE)

- Spaceflight ecosystem → Bowen + Southern Launch + TSA pathway.
- Space platforms → Titomic / Lab22 AM pilots.
- Trusted services → Fleet + EOS SSA adjacency.
- Microgravity → Koonibba commercial re-entry path.
- Exploration tech → remote/extreme systems transfer (open, not claimed).

CATCH SPINE (EVENT, NOT UNION)

- Field: AU geography + treaty · Signal: TSA, Statement on Space, Ship 40 · Catch: licensed pad, re-entry ops, commercial EP · Mirror: ASA/NRF/partners · Shadow: MoU absence, methalox gap, Eris slip · Choice: diligence vs cosplay · Creation: Academy / printed segment · Emergence: Verdict = next step.
- Do not make the second arrow (story/anaesthetic about destiny) into identity.

CARRYABLE + KEEP / COMPOST

1. Present compass, not Future prophecy.
2. Year 3000 stays Imagine — invention, not a schedule.
3. Country-feeling past meets open future — still two objects.
4. Access · stay · build · crew = industrial physics.
5. Hard no's stay hard; soft \$ marked soft.
6. Verdict = next diligence step, not destiny.

KEEP: fact locks · TSA/Statement · Ship 40 adjacency framing · Neumann cadence · Southern re-entry · prepare-not-predict. COMPOST: Starbase-clone fantasy · AU-as-year-3000-capital prophecy · lyric quotes · collapsing Continuum/SAT/Atlas/Starfleet into one till · MoU cosplay.
